English

Vietnamese

About Me

I am currently pursuing a degree in Computer Science, a field that has equipped me with strong skills in problem-solving and software development. Looking ahead, my primary career goal is centered on leveraging technology to create positive social impact. I aim to build innovative projects and applications that directly contribute to the community and address real-world societal needs. Ultimately, I want my work in Computer Science to make a meaningful difference and foster social progress.

EXTRACURRICULAR ACTIVITIES
